

Business Mission to Singapore and Vietnam 15th–19th June 2015

Deadline for applications: 13 February 2015

EU Business Avenues, funded and managed by the European Union, organises coaching and one-week business missions to South East Asia for European companies

Discover the Singaporean and Vietnamese markets with EU Business Avenues through:

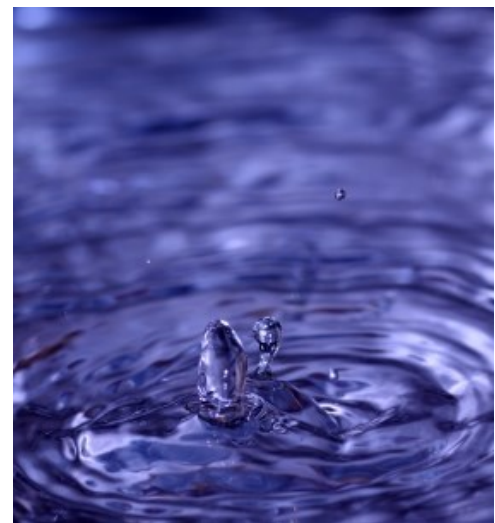

- Coaching ahead of, during and after the business mission
- Targeted promotion of your company in Singapore and Vietnam
- Business matching events including 1-2-1 meetings in Singapore and Vietnam
- Networking with counterparts in Singapore and Vietnam
- Innovative site visits in the water and environmental industry
- Free inter-cultural business courses by local experts
- Briefings on market and sector opportunities
- Co-funded customised services (80% up to 1600 EUR)
- Financial support for accommodation (up to 1000 EUR)

Clean Technologies opportunities in Singapore and Vietnam:

- Use Singapore as a sales and R&D hub for South East Asia
- Singapore is a leading player in water technology
- Main focus areas in Singapore range from overall water solutions to waste management, air pollution control and recycling while there is a pressing focus on clean water and waste management in Vietnam
- Secondary mission focus lies on renewable energies, for both Singapore and Vietnam; smart grids and energy efficiency for Singapore only
- Number of governmental initiatives both in Singapore and Vietnam for the development of the local environment & water industry as well as renewable energy projects

Potential for outstanding and innovative European technologies and materials.

Funded by
the European Union

Who can Apply

The Business Missions are open to companies that:

- Exist for 5 years and are able to demonstrate 3 years of financial figures
- Are entirely or majority EU-owned
- Are headquartered in the European Union
- Are active and operational in Water Technology, Environment, Renewable Energy or Energy Efficiency, either as a producer, a sub-contractor or as an R&D or engineering company with its own technology
- Have a proven track record of international business cooperation
- Have a solid business strategy for entering the South East Asian markets
- Have a sufficient turnover and staff employed to successfully enter South East Asian markets
